

# 542 SERIES HIGH FLOW BACKUP

The 542 Series High Flow Back-Up is designed to provide a “smart” reserve supply to high flow gas generators or bulk supply systems. If there is a loss of power, or if the gas generator or bulk supply system cannot provide sufficient gas, the 542 Series will automatically activate the reserve supply to supply gas without interruption. The unique feature of the 542 is that these functions are controlled by an on board micro-processor. In addition to the on board systems, the 542 is equipped with web server technology allowing for remote monitoring and control functions. Together, these advanced systems continually monitor pipeline pressure and reserves and can be programmed to engage at a specific pressure. The 542 is available for nitrogen, oxygen, air, helium, carbon dioxide, nitrous oxide, or argon in high purity barstock brass construction.

## Typical Applications

- Bulk or Microbulk Backup Supply
- Air or Nitrogen Generator Backup
- Cell Culture Incubators and IVF
- Critical Laboratory Gas Reserve
- Gas Chromatography, Flame Ionization Detector, and Mass Spectrometer Backup

## Features

**Programmable Setpoint Pressure** permits the user to set the back-up to engage at a specific pressure

**Programmable Inlet Alarm Pressure** allows user to set a low reserve alarm point

**Onboard Web Server Technology** enables real-time, online system monitoring

**High Flow Capacity** supports building or facility systems

**Check Valve on Primary and Reserve** prevents backflow to either

## Materials and Specifications

**Maximum Primary Source Pressure:** 15-120 PSIG (1-8 BAR); 15-250 PSIG (1-17 BAR)

**Temperature range:** 0°F to 140°F (-18°C to 60°C)

**Helium leak integrity:**  $1 \times 10^{-8}$  scc/sec 316L stainless steel or brass barstock

**Cv:** 1.0

**Regulator Body:** Brass barstock

**Bonnet:** Chrome-plated, die-cast zinc

**Seat:** PCTFE

**Filter:** 40-micron 316 mesh

**Regulator Diaphragm:** 316L stainless steel

**Check Valve Seats:** Chloroprene

**Enclosure:** NEMA 12, Powder-coated steel

**Weight:** 45 lbs (20.45 kg)

**Conformances:** ANSI/ASME B40.1; CRN OH17950.5

# 542 SERIES HIGH FLOW BACKUP
